baja designs®
The Scientists of Lighting

LIMITED LIFETIME WARRANTY

Baja Designs proudly offers a LIFETIME WARRANTY against manufacturer's defect on all the products that we manufacture.

These are comprehensive warranties; other than the exclusions below – you're covered. If your LED or HID bulb burns out, you're covered. Additionally, cutting off our connector or changing your lenses does not automatically void your warranty.

Exclusions:

Installation errors, abuse, misuse or crash damage. You must be the original owner of the product and can supply proof of purchase.

Baja Designs manufactures its own products as well as resells products manufactured by others. Baja Designs makes no express or implied warranties on products not manufactured by Baja Designs including without limitation any warranties or merchantability and fitness for a purpose. We will however, pass on all warranties made by the manufacturer, who has sole responsibility for performing such warranties.

Baja Designs will pay the freight if your product is less than 90 days old, otherwise defective products must be returned to Baja Designs, Inc., freight prepaid. At our option, we will repair or replace items in question and return them at no charge. If the identical product is no longer available, we will replace with a similar product of equal value. Baja Designs Inc. will not be responsible for any indirect or consequential damages in connection with defective merchandise. Items purchased through a Baja Designs authorized dealer must be returned through the dealer. Only available on LED auxiliary lights and product must be in sellable condition at MSRP. Product that has been damaged in any way after the original purchase date will be excluded from this guarantee.

Indemnification:

Buyer hereby acknowledges off-roading, racing and driving at night are dangerous activities and that the products and/or supplies purchased from Baja Designs are used in an inherently dangerous activity that may endanger life and limb; and in no event shall the seller, or seller's heirs and assigns, be held liable for consequential damages, nor shall seller's liability on any claim for damages arising out of or connected with the sale, delivery, or use of purchased products and/or supplies exceed the purchase price of the products and/or supplies.

****Do the following steps one side at a time to prevent the roll cage holes from becoming misaligned****

Remove factory roll cage bolts pictured above.

Insert bolts supplied with kit into the location where the factory bolts were previously removed in the same orientation as pictured above. Thread on the previously removed factory nuts, tighten the bolts until the roll cage sides draw together and the bolts are tight just as previous to removal.

****Note: The kits bolts will have a black oxide finish and the same 10.9 grade as the factory bolts but will be longer****

The Scientists of Lighting

Slide bracket over the longer, previously tightened kit bolts with the RTL light mounting flange pointing towards the rear of the vehicle as shown above.

baja designs
The Scientists of Lighting

With supplied kit hardware, slide a washer over each bolt, thread on the M10 nuts and tighten to secure the bracket to the frame.

Note: the washers and bolts in this step are stainless steel with a silver finish

After both driver and passenger sides are secure as previously described, slide the 1/4"-20 bolts supplied with the kit into the channel on your RTL light's housing and insert the bolts into the mounting brackets.

Once both bolts have been inserted into the light and brackets slide the 1/4" washer over each of the bolts and thread on the nyloc nuts.

Once the RTL light has been centered from left to right on the vehicle, snugly tighten the 1/4" nyloc nuts to secure the light to the vehicle.

Optional vehicle specific, plug and play, wiring solutions for your RTL may be purchased from *Baja Designs*.

For any RTL besides RTL-s, the Baja Designs wire harness part number is: 64-0116

For RTL-s, the Baja Designs wire harness part numbers are: 64-0111 & 64-0116 (this light requires two wire harnesses since it has two power cords)

Disclaimer: This kit is only intended for use with full size RTL light bars (not RTL-m) 4 seat Polaris RZR 1000 with factory roll cage and factory Polaris plastic or Polaris aluminum roofs or with no roof at all.
