

BACK SEAT DOG BED

Your CANINE COVER is easy to maintain and a quick shake and/or brushing will normally suffice. To Clean: Remove the mattress pad & bolster and wash the cover using 1/4 cup of Simple Green All-Purpose Cleaner. Put the cover in the washer and pour the cleaner in the tub after it's filled with water or pour it directly in the machine, then put in the cover and start the machine. 2. Rinse the cover twice (2X) to remove all the cleaner. 3. Hang and allow to air dry. No Bleach.

You can also spot-clean if required.

- 1 - Mix one ounce Simple Green All-Purpose Cleaner per quart of warm water.
- 2 - Spray or sponge onto cover.
- 3 - Rinse with plain water (until no suds) and allow to air dry.

Step # 1

Lay the Dog bed across the back seat. The Canine Covers label should be facing to the front.

Step # 2

Locate the webbing loops that are sewn on the rear side of the Dog Bed.

Step # 3

Pass the seat belt buckles through the webbing loops.

Step # 4

Secure the seat belts by connecting the seat belt buckles together in their normal fashion.

Step # 5

Be sure the Dog Bed is attached securely to the seat with the seat belts. Attach webbing straps and or seat anchor hook and loop straps on the seat back flap around head-rests or child latch fixtures.

Step # 6

Load your travel buddy and you're good to go! NOTE - Dogs that travel in vehicles should always be secured with a harness to help prevent injury.
