

# Heatshield Armor Tape™

**1100°F**  
CONTINUOUS

**2000°F**  
INTERMITTENT

Heatshield Armor Tape™ is used to repair Heatshield Armor or HP Sticky Shield™. It may also be used on tight seams of Heatshield Armor as a cosmetic improvement, and can be added to the ends of the exposed insulation of HP Sticky Shield™ to further protect from the elements and extend the product's life. Heatshield Armor Tape™ can be used to shield radiant heat from components. The heavy-duty peel-and-stick adhesive will adhere to most clean surfaces. The Armor Tape™ is not intended to hold Heatshield Armor in place; it should only be used on the cold side of insulation for cosmetic reasons.

## FEATURES

- Capable of reducing up to 90% of radiant heat
- Adhesive backing sticks to almost any clean surface
- Helps shield fuel lines, brake lines, wire looms and more from radiant heat
- May also be used to seal or repair HP Sticky Shield™

# Cool Foil Tape™

**1000°F**  
CONTINUOUS

**2000°F**  
INTERMITTENT

Cool Foil Tape™ is a lightweight thermal-insulating tape that reflects radiant heat away from wires, lines, cables and more on your car, 4x4, motorcycle or just about anything. This tape is an excellent way to insulate components without disassembly, or be used as a means to finish off other forms of thermal insulation to prevent fraying. Cool Foil Tape™ is very economical compared to other forms of heat protective tape, and it cuts easily and has a self-adhesive backing that sticks to most clean surfaces. Cool Foil Tape™ withstands 1,000 degrees F of continuous radiant heat and up to 400 degrees F direct contact.

## FEATURES

- Capable of reducing up to 80% of radiant heat
- Adhesive backing sticks to almost any clean surface
- Helps shield fuel lines, brake lines, wire looms and more from radiant heat
- May also be used to seal sleeving to hose or line
