## BED X-TENDER ASSEMBLY

Measure 7" from each end of the three center tubes and mark with tape. **Tape is to be used as a reference point**

**1** Note: Template located on inside of box.

Slide 3 center tubes into the open ends of the bent tubes as shown. Insert center tube with logo into the center tube.

**2**

Connect the two halves. Make sure there is at least 3" overlap with the bent tubes on each side.

**3**

Adjust the width of the BEDXTENDER by placing the pivots into the mounting brackets. To keep overlap constant, adjust each tube so that the gap between the edge and the tape is the same.

**4**

## BED X-TENDER ASSEMBLY – CONTINUED

Attach plastic upright around the tube juncture, placing rubber bumpers into the two ends of the upright.

*Upright is not positioned in center of tube joint.*

**NOTE:** The inside of the upright is stepped to fit correctly around the small and large diameter tubes.

7

Tighten PT-Screws using a T-25 torx driver, starting in the middle of each upright, then the outer screws and lastly the remaining two to evenly tighten.

**NOTE:** Do not over tighten as this may strip out. Fastener will reach a noticeable stopping point.

8

Adjust Strap Buckles to lock into the tailgate when BEDXTENDER is deployed. Your assembly is now complete.

9

When the BEDXTENDER is at the furthest rear position, push down on the buckle to insert into tailgate latch. Tighten straps. To release, pull tailgate handle.

NOTE: Ensure that buckles are properly inserted into latches by pulling on the straps after both buckles have been inserted.
